

# Energy Guidelines

## Goals

We set energy goals for our company, create the framework and resources for their achievement and monitor them.

## Law

We recognize applicable law as a minimum standard. We fulfil all energy related laws and internal requirements regarding energy efficiency, energy usage and energy consumption.

## Continuous Improvement

We work continuously together with our employees to improve our energy management system and our energy efficiency. We consider potentials to improve our energy-related performance in the design of new buildings, systems, facilities and locations.

## Business Partner

We influence our business partners, to proceed according to our own or comparable principles.

## Procurement

We support the procurement of energy efficient products and services. We inform our suppliers that energy efficiency is a selection criterion for us.

## Executives

Our executives promote the efficient use of energy through their role model function.

## Specialists

Specialists advise, support and inform us appropriately on all questions relating to energy and energy efficiency.
